**Navy/Northrop-Grumman, Bethpage, NY:** Congressman Thomas Suozzi (D-NY03) has invited EPA to a roundtable discussion on May 29, regarding the Navy/Grumman plume remediation efforts. These roundtable discussions have been held annually since 2017. Officials from the Bethpage Water District, the Town of Oyster Bay, NYSDEC, the US Navy, and Northrop Grumman have agreed to participate in the event. The stated purpose of the meeting is to bring all interested parties together to review the progress made over the past year, and to determine how the parties can work together to accelerate the clean-up of the site in the most effective and efficient manner possible. This is a State-led project with EPA oversight responsibilities. LRPB and SEMD staff will attend this meeting.
